Application/Control Number: 10/824,521 Page 2

Art Unit: 3635

1. This is a first Office action on the merits for application serial number 10/824521 filed 04/14/04. Claims 1-20 are pending.

- 2. Claims 7, 9 and 11 are objected to because of the following informalities: in claim 7 it is unclear why there is the number "1" at line 2, in claim 9, "said bottom frame member" lacks antecedent basis, and in claim 11 "remarkably" appears to be a typo.

  Appropriate correction is required.
- 3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 4,682,448 to Healey.

Healy provides frame assembly 36 having telescopic, slidably adjustable support members 34 coupled to bottom wall 52 and an enclosure means 10. A common axis could be drawn through two of the support members in either of a long or short direction. The outer surface of the upper support members provides a gripping means and the inner surface of the lower support member provides a receiving means. Casters 54 are provided.

Application/Control Number: 10/824,521 Page 3

Art Unit: 3635

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 8-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over
- U.S. Patent 4,682,448 to Healy in view of U.S. Patent 6,783,563 to Eckhoff et al.

Healy provides each of the elements of the claims except that the support members are removably coupled to the upper frame and bottom platform or that the support members extend from the a point proximal the center of the edge portions.

Eckoff teaches that at the time of the invention it was known that adjustable supports between a lower platform 124 and an upper table frame 102 could be either permanently or removably affixed. Eckoff further teaches that the location and size of the supports may be varied as contemplated by one of ordinary skill in the art and shows an embodiment in figure 4 having two supports located and approximately the center of the edge of the platform.

It would have been obvious at the time of the invention to one having ordinary skill in the art particularly in view of the teachings of Eckoff that two centrally located supports is equivalent to four corner supports and could have been substituted for the supports of Healy. It would have been nothing other than an obvious choice of design (Eckoff column 4, lines 28-30). Further, it would have been obvious to one having ordinary skill in the art that the supports could have

Application/Control Number: 10/824,521 Page 4

Art Unit: 3635

been removably affixed to both the upper frame 36 and lower platform in view of the teachings of Eckoff (column 4, lines 25 and 26). It would have been desirable to assist in breaking down the device of Healy for storage and transport.

- 7. Receipt is acknowledged of the IDS filed 04/26/04. An initialed copy of the 1449 form is attached.
- 8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J. Canfield whose telephone number is 571-272-6840. The examiner can normally be reached on M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Friedman can be reached on 571-272-6842. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
